

Williams Academy STL Corporate Sponsor Deck

Williams Academy STL Agenda

Williams Academy trains its students using our fun, but well sophisticated STEAM program.

The program provides students a hands on learning experience to explore the world of Science, Technology, Engineering, Arts, and Mathematics at their finger tips.

Our classrooms are technologically integrated for ages 6 weeks to 13 years old.

- Curriculum: Early Childhood Montessori Diploma Program
- Learning Program: S.T.E.A.M
- Entertainment Center
- State of the art Kitchen & Cafeteria
- 2 Indoor Activity Rooms
- Interactive Outdoor Playground
- Providing 20 to 40 New Career Teaching Jobs (Education)

Montessori Learning

The Montessori method of education involves children's natural interests and activities rather than formal teaching methods. A Montessori classroom places an emphasis on hands-on learning and developing real-world skills. It emphasizes independence and it views children as naturally eager for knowledge and capable of initiating learning in a sufficiently supportive and well-prepared learning environment. The underlying philosophy can be viewed as stemming from Unfoldment Theory. It discourages some conventional measures of achievement, such as grades and tests.

The Facility

Kitchen

Healthy Meals for a Health Brain

Outdoors

Games to stimulate human interaction amongst age groups.

Classroom

Interactive learning with technology and robotics.

Activity Room

Indoor spaces to release positive energy with exercise.

Sponsor The Future Today!

Sponsor a Class

Your contribution to "Sponsor A Class" will come with one year naming rights of a particular classroom or activity room within our building. Building your brand connectivity with the youth and the sophisticated trajectory of our learning center.

Scholarships

Scholarships helps families send their child to a state of the art learning center. Advanced early childhood education is critical to the moral compass and learning path of a child's life.

Donate

Here your donations certainly boosts students' interest and engagement. Aside from helping them focus in class, it allows more educational programming and get different perspectives on the subject matter.
